## Health Exploration Center Field Trip- Wednesday, March 14th

If you have a permission slip attached, please sign and return it immediately. The following people have signed up to chaperone:

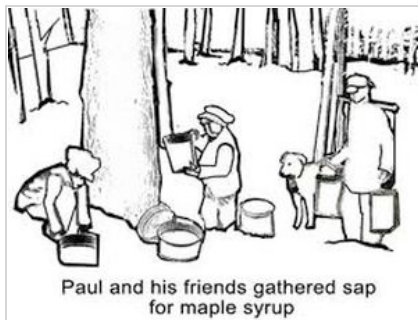

On Wednesday, March 14th, our child will need to be at school at 10:00 and we will return at 1:00. Your child will need to be picked up in the room at that time. On that day we will have a mini-lunch upon arrival at school.

We have cheese and need some fruit for that day's snack. Please let me know if you can offer a donation for the snack. (Our snack cupboard is bare. We need several boxes of crackers to have a little back up.)

This field trip offers the chance for our students to experience many hands-on activities and to learn more about their bodies and how they work. We are beginning our classroom study very soon.

## Maple Sap

Today the maple sap really started flowing. Our trees have provided us with enough sap to begin boiling it down in the classroom. Hopefully the next week will yield us enough sap to have a pancake feast in the next few weeks. If you smell the sap boiling when you stop in the classroom that's where it is coming from.

## Smile Foundation

The Smile Foundation is an organization which provides the resources for the surgery to provide the surgery to correct cleft palate. Thursday before break Leslie's

class presented information about this fund raiser. Part of the conversation was about bringing in money the children earned through their at home tasks and bringing part of that money as a donation. Any donation is welcome!

## Gallon Milk Jugs

Please wash and save your gallon milk jugs. We have begun gathering maple sap from several trees on the schoolyard. I would like to construct a model of how

## Class Needs

**Liquid Soap Pumps Update** - As you empty a liquid soap pump at home please wash it and send it to school. We need the kind for thick soap. This is a project for the future and **we will need**

much sap it takes to make a gallon of maple syrup. It takes 40 gallons of sap to make one gallon of syrup. That means we will need 40 milk jugs. We need everyone's help. Thanks!

**one pump per child** in a few months. At this point we have 5 pumps. Be sure and keep what you have and send them to school. Thanks!
